Wiktoria Bardzik

Student

Hardworking, reliable and responsible person with excellent organisational skills that is motivated to work on any sets of tasks with anyone as I have the ability to work in a team efficiently however, I am always able to finish tasks myself if needed. Quick learner, adaptable, and dedicated to delivering high-quality work in any task or role. Always ready to take on new challenges thanks to having a clear logical mind and a practical approach to problem-solving.

PROJECTS

Research project (01/2025 - Present)
- Researching a framework for medical-specific LLMs to ensure inclusion of underrepresented specialties and languages, improving fairness and accessibility in medical AI.

Real world Projects (09/2024 - 12/2024)
- Working with real clients to produce a prototype that meets the clients expectations and requirements.
- Had meetings with the client to gather enough information about their project to be able to produce a prototype for them that satisfies their ideas.

School points project (02/2024 - 12/2024)
- School points website where teachers would add or take away points from students, Students can then see their points and the comments left by the teacher in each category. Parents could also see their child's points.
- Completed the project in a team, One of my roles in the team was to keep everyone on track. I managed the timelines and deadlines and helped team members to meet the deadline.

AWARDS

Winner of RGU Hack - elementz Challenge (02/2025 - 02/2025)
Worked in a team to develop a functional website that shows the location of subsea assets, vessels, pipelines and points of interest. These locations are shown on a 3d globe with 3d models representing each asset, the locations were taken from an api that was provided by the sponser.

Winner of RGU Hack - Best Presentation (02/2025 - 02/2025)
Produced a presentation with the team that included a fun storyline to keep the audience engaged while also explaining the technical side of the project
